Limitations of Population Projections

The calculations and assumptions that form the basis for population projections are drawn from historical patterns of population change. Thus, the accuracy of projections depends greatly on the degree to which recent historical patterns remain true into the future. A host of external influences such as public policy initiatives, shifts in economic growth, or changes in migration can lead to new population trends that were not foreseen.

Data Sources

- Enrollment data for grades 1-12 from the CT State Dept. of Education

Asnuntuck Community College

Enfield, CT

In the fall of 2014, 7% of students at Asnuntuck CC were from Suffield.

Enrollment in Asnuntuck Community College declined by 13% from 2010 through 2014. Most students are residents of Enfield (38%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will decrease in number. Only ages 30 to 39 will increase in population. This shift is partially influenced by the aging of the state's Baby Boomer population. The White population will decrease in number while minority populations increase. The largest population increase will be among the Hispanics followed by Blacks.

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Fig. 3: Educational Attainment Top 10 Towns 2014 for Ages 25+

Fig. 4: Population Change Race/Ethnicity Household Population: 2010 to 2025

Enfield Labor Market Area (LMA)

Towns in LMA

Asnuntuck Community College enrolls students mostly from the Enfield LMA and secondarily from the Hartford LMA.

In 2015, the Enfield Labor Market Area (LMA) was the smallest in geographic area and had a labor force of 49,500. From 2010 through 2015, the size of the labor force declined slightly by 200 workers. In 2015, the unemployment rate in this LMA was 5.2 percent, which was below the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, housing stock grew with 0.2% (0.002) more units added. Population turnover is average with 12 percent of residents (age 25+) having moved to a different location within the past year. Hartford accounts for a disproportionate amount of the population turnover.

Among the top 5 towns from 2010 to 2014, changes in median household income were mixed as were changes in unemployment.

2010 to 2014**

Capital Community College

Hartford, CT

Enrollment in Capital Community College declined by 9.5% from 2010 through 2014. Most students are residents of Hartford (41%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will see a slight decrease in number; however, the population within age groups is forecast to change dramatically. Younger ages 15 to 29 will decrease in number while ages 30 to 49 increase. This shift is because of the state's aging Baby Boomer population. The White population will decrease in number while minority populations increase. The largest population increase will be among Hispanics followed by Blacks.

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Demographics

Hartford Labor Market Area (LMA)

Capital Community College enrolls students mostly from the Hartford LMA.

In 2015, the Hartford Labor Market Area (LMA) was the largest in geographic area in Connecticut and had the largest labor force at 616,400. From 2010 through 2015, the size of the labor force declined by nearly 2%. In 2015, the unemployment rate in this LMA was 5.7 percent, which was slightly higher than the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, housing stock remained virtually unchanged with only 0.09% (0.0009) units added. Population turnover is relatively high with 13 percent of residents (age 25+) having moved to a different location within the past year.

Among the top 5 towns from 2010 to 2014, median household income declined and unemployment increased.

2010 to 2014

Gateway Community College

New Haven, CT

Enrollment in Gateway Community College increased by 13% from 2010 through 2014. Most students are residents of New Haven (29%) followed by West Haven (12%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will remain virtually unchanged; however, the population within age groups is forecast to change. Younger populations ages 15 to 29 will decrease in number while ages 30 to 49 will increase. This shift is because of the state's aging Baby Boomer population. The White population will decrease in number while minority populations increase. The largest population increase will be among Other (Asians) followed by Hispanics then Blacks.

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Fig. 4: Population Change Race/Ethnicity Household Population: 2010 to 2025

New Haven Labor Market Area (LMA)

Gateway Community College enrolls students mostly from the New Haven LMA and secondarily from the Bridgeport-Stamford LMA.

In 2015, the New Haven Labor Market Area (LMA) had the 3rd largest labor force in Connecticut at 322,900. From 2010 through 2015, the size of the labor force declined by 1 percent. In 2015, the unemployment rate in this LMA was 5.7 percent, which was slightly higher than the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, housing stock grew with 1% units added. Population turnover is relatively high with 13 percent of residents (age 25+) having moved to a different location within the past year. Most of the population turnover is in New Haven and Bridgeport.

Among the top 5 towns from 2010 to 2014, median household income declined and unemployment increased.

**Fig. 8: Unemployment Rate
2010 to 2014**

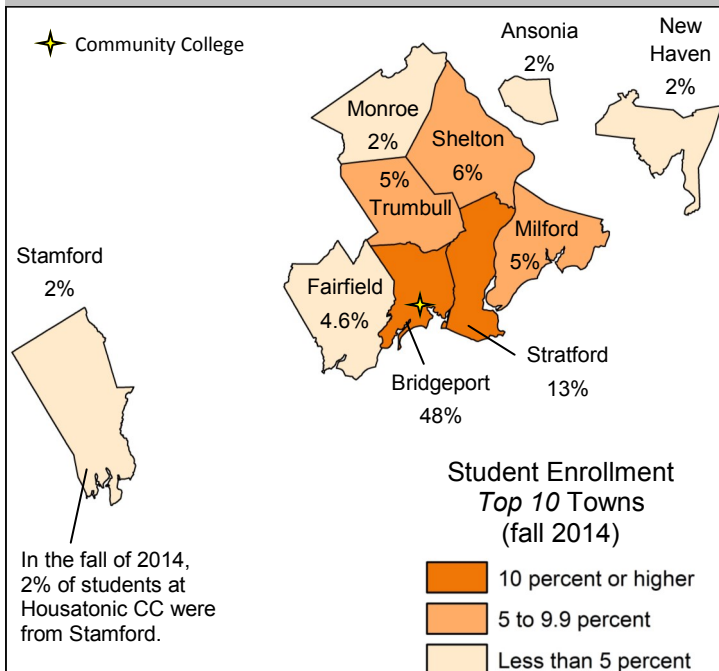

Housatonic Community College

Bridgeport, CT

Enrollment in Housatonic Community College declined by 14% from 2010 through 2014. Most students are residents of Bridgeport (48%) followed by Stratford (13%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will remain virtually unchanged; however, the population within each age group is forecast to change dramatically. Younger populations ages 15 to 29 will decrease in number while ages 30 to 49 will increase. This shift is because of the state's aging Baby Boomer population. The White population will decrease in number while minority populations increase. The largest population increase will be among Blacks and Other (Asians). The size of the Hispanic population will remain mostly unchanged.

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Demographics

Bridgeport-Stamford Labor Market Area (LMA)

Housatonic Community College enrolls students mostly from the Bridgeport-Stamford LMA.

In 2015, the Bridgeport-Stamford Labor Market Area (LMA) had the 2nd largest labor force in Connecticut at 464,800. From 2010 through 2015, the size of the labor force increased slightly by 700 workers. In 2015, the unemployment rate in this LMA was 5.5 percent, which was slightly lower than the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, housing stock increased with 2% units added. Population turnover is average with 12 percent of residents (age 25+) having moved to a different location within the past year. New Haven and Bridgeport account for most of the turnover.

Among the top 5 towns from 2010 to 2014, median household income increased slightly in Shelton and declined in the other 4 towns. Unemployment increased in all 5 towns.

Socioeconomics

2010 to 2014**

Manchester Community College

Manchester CT

Community College

Enrollment in Manchester Community College declined by 3% from 2010 through 2014. Most students are residents of Manchester (14%) followed by East Hartford (11%), and Hartford (10%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will have a slight decrease in number; however, the population within age groups is forecast to change. Younger ages 15 to 29 will decrease in number while ages 30 to 49 increase. This shift is because of the state's aging Baby Boomer population. The White population will decrease in number while minority populations increase. Both Hispanics and Blacks will have large population increases.

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Hartford Labor Market Area (LMA)

 Towns in LMA

Manchester Community College enrolls students mostly from the Hartford LMA.

In 2015, the Hartford Labor Market Area (LMA) was the largest in geographic area in Connecticut and had the largest labor force at 616,400. From 2010 through 2015, the size of the labor force declined by nearly 2%. In 2015, the unemployment rate in this LMA was 5.7 percent, which was slightly higher than the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, housing stock grew with 0.3% (0.003) units added. Population turnover is average with 12 percent of residents (age 25+) having moved to a different location within the past year. Hartford, Vernon, and Manchester account for most of the turnover.

Among the top 5 towns from 2010 to 2014, median household income declined and unemployment increased.

Middlesex Community College

Middletown, CT

Student Enrollment
Top 10 Towns
(fall 2014)

Community College

In the fall of 2014
3% of students at
Middlesex CC
were from Old
Saybrook.

Enrollment in Middlesex Community College increased by 2% from 2010 through 2014. Most students are residents of Meriden (22%) followed by Middletown (18%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will have a slight decrease in number. Only the age group 35 to 39 will have any growth with all other age groups declining in population. This shift in population is different from most other areas of Connecticut. The White population will have the smallest increase in number while minority populations will increase more dramatically. The largest population increase will be among Hispanics followed by Blacks then Other (Asians).

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

New Haven Labor Market Area (LMA)

Middlesex Community College enrolls students mostly from the New Haven LMA and secondarily from the Hartford LMA.

In 2015, the New Haven Labor Market Area (LMA) had the 3rd largest labor force in Connecticut at 322,900. From 2010 through 2015, the size of the labor force declined by 1 percent. In 2015, the unemployment rate in this LMA was 5.7 percent, which was slightly higher than the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, housing stock grew with 0.6% (0.006) units added. Population turnover is relatively low with only 10 percent of residents (age 25+) having moved to a different location within the past year. Most of the turnover is in Middletown.

Among the top 5 towns from 2010 to 2014, median household income declined and unemployment increased.

Naugatuck Valley Community College Waterbury, CT

Enrollment in Naugatuck Valley Community College declined by 1% from 2010 through 2014. However, enrollment increased 6% among the top 10 towns. Most students are residents of Waterbury (30%) followed by Danbury (12%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will have a slight decrease in number. Ages 15 to 19 and 40 to 49 will have a large decrease while ages 30 to 39 will have a large increase. Unlike other areas of CT, the White population will have the largest population increase. The 2nd largest population increase will be among Other (Asians).

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Demographics

Waterbury Labor Market Area (LMA)

 Towns in LMA

Naugatuck Valley Community College enrolls students mostly from the Waterbury LMA and secondarily from the Danbury LMA.

In 2015, the Waterbury Labor Market Area (LMA) had a labor force of 111,100. From 2010 through 2015, the size of the labor force declined by 3 percent. In 2015, the unemployment rate in this LMA was 7.1 percent, which was significantly higher than the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, housing stock grew with slightly more than 1% units added. Population turnover is low with 9 percent of residents (age 25+) having moved to a different location within the past year. The majority of the turnover is in Waterbury and Danbury.

Among the top 5 towns from 2010 to 2014, median household income declined and unemployment increased.

Northwestern Community College

Winchester, CT

Enrollment in Northwestern Community College declined by 1% from 2010 through 2014. Most students are residents of Torrington (33%) followed by Winchester (15%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will have a slight decrease in number; however, the population within age groups will change dramatically. Opposite to statewide trends, ages 15 to 29 will increase in number while ages 35 to 49 decrease. Also opposite to statewide trends, the White population will increase significantly. Minority populations will increase mostly among Other (Asians). The population of Hispanics is forecast to decrease.

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Demographics

Torrington Labor Market Area (LMA)

Northwestern Community College enrolls students mostly from the Torrington LMA and secondarily from the Hartford LMA.

In 2015, the Torrington Labor Market Area (LMA) had a labor force of 47,800. From 2010 through 2015, the size of the labor force declined by 2 percent. In 2015, the unemployment rate in this LMA was 5.2 percent, which was lower than the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, housing stock grew with 0.5% (0.005) units added. Population turnover is low with 9 percent of residents (age 25+) having moved to a different location within the past year. Goshen accounts for a disproportionate amount of turnover.

Among the top 5 towns from 2010 to 2014, median household income increased in Torrington and declined in the other four towns. Unemployment decreased in

Norwalk Community College

Norwalk, CT

Enrollment in Norwalk Community College declined by 4% from 2010 through 2014. Most students are residents of Stamford (34%) followed by Norwalk (27%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will remain about the same as will the population within all age groups, which is unusual compared to other areas of Connecticut. The White population will decrease in number while minority populations increase. The largest population increase will be among Blacks and Other (Asians). The size of the Hispanic population will remain mostly unchanged.

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Bridgeport-Stamford Labor Market Area (LMA)

Norwalk Community College enrolls students mostly from the Bridgeport-Stamford LMA.

In 2015, the Bridgeport-Stamford Labor Market Area (LMA) had the 2nd largest labor force in Connecticut at 464,800. From 2010 through 2015, the size of the labor force increased slightly by 700 workers. In 2015, the unemployment rate in this LMA was 5.5 percent, which was slightly lower than the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, housing stock grew with 1% units added. Population turnover is average with 11 percent of residents (age 25+) having moved to a different location within the past year. Bridgeport and Stamford account for most of the turnover.

Among the top 5 towns from 2010 to 2014, median household income declined and unemployment increased.

Quinebaug Valley Community College Killingly, CT

Enrollment in Quinebaug Valley Community College declined by 17% from 2010 through 2014. Most students are residents of Windham (17%) followed by Killingly (16%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will remain virtually unchanged; however, the population within age groups will change. Ages 15 to 19 and 40 to 49 will decrease in number while ages 25 to 39 increase. This shift is partially because of the state's aging Baby Boomer population. The White population will decrease slightly in number while minority populations increase. The largest population increase will be among Other (Asians).

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Demographics

Willimantic-Danielson Labor Market Area (LMA)

Quinebaug Valley Community College enrolls students mostly from the Willimantic-Danielson LMA.

In 2015, the Willimantic-Danielson Labor Market Area (LMA) had the smallest labor force in Connecticut at 42,900. From 2010 through 2015, the size of the labor force declined by 2 percent. In 2015, the unemployment rate in this LMA was 6.1 percent, which was significantly higher than the statewide rate of 5.6 percent.

From 2010 to 2014 in the top 10 towns, the housing stock grew with 1% more units added. Population turnover is low among the top 10 towns with 10 percent of residents (age 25+) having moved to a different location within the past year. Most of the turnover is in Windham.

Among the top 5 towns from 2010 to 2014, median household income declined while changes in unemployment were mixed.

Three Rivers Community College

Norwich, CT

Enrollment in Three Rivers Community College declined by 12% from 2010 through 2014. Most students are residents of Norwich (20%) followed by Groton (12%), and New London.

By 2025 in the 10 towns, the total population ages 15 to 49 will have a slight decrease in number; however, the population within age groups will change. Ages 15 to 29, as well as 40 to 49, will decrease in number while ages 30 to 39 increase. This shift is partially because of the state's aging Baby Boomer population. The White population will increase in number and the Hispanic population will decrease. The largest population increase will be among Blacks and Other (Asians).

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Tunxis Community College

Farmington, CT

Enrollment in Tunxis Community College declined by 9% from 2010 through 2014. Most students are residents of New Britain (19%) followed by Bristol (16%).

By 2025 in the top 10 towns, the total population ages 15 to 49 will shave a slight decrease in number; however, the population size within age groups will change. Younger ages 15 to 29 will decrease in number while ages 30 to 39 increase. This shift is partially because of the state's aging Baby Boomer population. The size of the White population will decrease significantly while minority populations increase. The largest population increase will be among Hispanics.

Educational attainment is higher among Whites and Asians while lower among Hispanics and Blacks.

Demographics

Hartford Labor Market Area (LMA)

Tunxis Community College enrolls students mostly from the Hartford LMA.

In 2015, the Hartford Labor Market Area (LMA) was the largest in geographic area in Connecticut and had the largest labor force at 616,400. From 2010 through 2015, the size of the labor force declined by nearly 2%. In 2015, the unemployment rate in this LMA was 5.7 percent, which was slightly higher than the statewide rate of 5.6 percent.

Among the top 10 towns from 2010 to 2014, housing stock grew with 0.3% (0.003) units added. Population turnover is average with 12 percent of residents (age 25+) having moved to a different location within the past year. Hartford and New Britain account for most of the turnover.

Among the top 5 towns from 2010 to 2014, median household income declined and unemployment increased.
